Growth stack

Your stack should get *smaller.*

The quarterly audit that keeps it small.

Emanuel Werner

Step 1 of 4

Name the last *decision* it changed.

If nobody can name one, the tool is a habit, not a lever.

Ask

"When did this tool last change what we did?"

Step 2 of 4

Can it answer next to *pipeline?*

A tool that can't talk to the others is one more report someone has to open.

Example

Ahrefs through MCP, in the same chat as GA4, Search Console and the CRM.

Step 3 of 4

3

Hours saved vs. *cost.*

If it fails step 2, it has to pay for itself in time. If it doesn't, cut it.

Example

Moz didn't pass. Semrush stayed, for Google Ads research.

Step 4 of 4

Cancel before the *renewal.*

Not after. A renewal you forgot is a decision you didn't make.

Tip

Keep every renewal date in one calendar.

The rule

Fewer tools, *better connected.*

Save this for your next budget review.
